# Table of Contents

**Anatomy**

An Atlas on the Comparative Anatomy of the Retinae of Vertebrates ................................................................. 1
An Anatomy: A Pressing Concern in Exercise Physiology Commitment to Professionalism ............................................ 1
Back and Spinal Cord - Digital Anatomy Atlas ........................................................................................................ 2
Head and Neck - Digital Anatomy Atlas .................................................................................................................... 2

**Andrology**

Male Infertility: An Integrative Manual of Western and Chinese Medicine ............................................................... 3

**Anesthesiology**

Anesthesia: A Topical Update - Thoracic, Cardiac, Neuro, ICU, and Interesting Cases ........................................... 4
Anesthesia: Essential Clinical Updates for Practitioners - Regional, Ultrasound, Coagulation, Obstetrics and Pediatrics .................................................................................................................................................. 4
Awake Thoracic Surgery ............................................................................................................................................... 5
The Anatomical Foundations of Regional Anesthesia and Acute Pain Medicine .......................................................... 5

**Anti-Infectives and Infectious Diseases**

Current Perspectives on Anti-Infective Agents ........................................................................................................ 6
Advances in HIV Treatment: HIV Enzyme Inhibitors and Antiretroviral Therapy ................................................. 6
Anthrax: History, Biology, Global Distribution, Clinical Aspects, Immunology, and Molecular Biology ................ 6
Antiprotostomal Drug Discovery: A Challenge That Remains ............................................................................... 7
Congenital Toxoplasmosis in Humans and Domestic Animals ................................................................................. 7
Current Diagnosis of Infant Tuberculosis Infection ............................................................................................... 7
Current Studies in HIV Research .......................................................................................................................... 8
Drug Resistant Tuberculosis: Practical Guide for Clinical Management ................................................................. 8
Emerging Chagas Disease ......................................................................................................................................... 8
Frontiers in Anti-infective Drug Discovery .............................................................................................................. 9
Frontiers in Anti-infective Drug Discovery ................................................................................................................ 9
Frontiers in Anti-infective Drug Discovery ................................................................................................................ 9
Frontiers in Anti-infective Drug Discovery .............................................................................................................. 9
Frontiers in Anti-infective Drug Discovery .............................................................................................................. 10
Frontiers in Anti-infective Drug Discovery .............................................................................................................. 10
Frontiers in Anti-infective Drug Discovery .............................................................................................................. 10
Frontiers in Anti-infective Drug Discovery .............................................................................................................. 11

The challenges of antibiotic resistance in the development of new therapeutics .............................................. 11
Frontiers in Clinical Drug Research-Anti Infectives .............................................................................................. 12
Frontiers in Clinical Drug Research-Anti Infectives .............................................................................................. 12
Frontiers in Clinical Drug Research-Anti Infectives .............................................................................................. 13
Frontiers in Clinical Drug Research; Anti-Infectives ............................................................................................. 13
Frontiers in Clinical Drug Research-Anti-Infectives ............................................................................................. 13
Frontiers in Clinical Drug Research - HIV ........................................................................................................... 13
Frontiers in Clinical Drug Research - HIV ........................................................................................................... 14
Frontiers in Clinical Drug Research - HIV ........................................................................................................... 14
Frontiers in Clinical Drug Research - HIV ........................................................................................................... 14
HPV Infections: Diagnosis, Prevention and Treatment .......................................................................................... 15

Immune Response to Parasitic Infections: Protozoa ............................................................................................ 15
Immune Response to Parasitic Infections: Immunity to Helminths and Novel Therapeutic Approaches .................. 15
Laser Optofluidics in Fighting Multiple Drug Resistance ........................................................................................ 16
Molecular and Cellular Biology of Pathogenic Trypanosomatids ........................................................................ 16
Multi Drug Resistance: A Global Concern ........................................................................................................... 16
Pathogenic Escherichia coli in Latin America .......................................................................................................... 17
Pharmacokinetics and Pharmacodynamics of Antimalarial Drugs Used in Combination Therapy ..................... 17
Tropical Diseases: An Overview of Major Diseases Occurring in the Americas .................................................... 17
Tuberculosis Treatment: The Search For New Drugs ............................................................................................ 18
Update in Infectious Diseases ................................................................................................................................ 18
Vaccines for Latent Viral Infections ...................................................................................................................... 18
Water-borne Protozoa in Humans .......................................................................................................................... 19
The Role of New Technologies in Medical Microbiological Research and Diagnosis ........................................... 19

**Cardiology**

4D Fetal Echocardiography ...................................................................................................................................... 20
Cardiac Resynchronization Therapy: An Established Pacing Therapy for Heart Failure and Mechanical Dyssynchrony ... 20
Clinical Nuclear Cardiology: Practical Applications and Future Directions ........................................................... 20
Degenerative Aortic Valve Disease, its Mechanism on Progression, its Effect on the Left Ventricle and the Postoperative Results ...................................................................................................................... 21

**Biochemistry of Andrology**

.................................................................................................................................................................................. 3

**Degenerative Aortic Valve Disease, its Mechanism on Progression, its Effect on the Left Ventricle and the Cardiac Resynchronization Therapy: An Established Pacing Therapy for Heart Failure and Mechanical Dyssynchrony**

.................................................................................................................................................................................. 4
